

# OUR ENVIRONMENTAL APPROACH

DEAR SIR OR MADAM,  
WE WARMLY WELCOME YOU TO OUR ESTABLISHMENT.  
PROTECTING THE ENVIRONMENT IS AN INTEGRAL PART OF OUR VALUES. CONCERNED ABOUT YOUR COMFORT, THE WELL-BEING OF OUR TEAMS, AND THE FUTURE OF COMING GENERATIONS, WE ARE IMPLEMENTING CONCRETE ACTIONS TO REDUCE THE ECOLOGICAL FOOTPRINT OF OUR ACTIVITIES.

1

## WE INVOLVE OUR TEAMS AND OUR GUESTS

- Our staff members are trained in eco-friendly practices and CSR guidelines.
- We prioritize service providers and suppliers committed to a sustainable and responsible approach.
- Information and recommendations encourage our guests to adopt eco-responsible habits (exploring the city on foot, good practices on site).
- We limit printing and the use of consumables through responsible management of materials.

2

## WE SAVE WATER AND ENERGY

- A filtered water fountain is available for employees.
- Towels and bed linens are reused upon request to limit water consumption.
- We do not fully drain the swimming pool in order to preserve water resources.
- All our taps and showers are equipped with flow restrictors.
- More than 75% of our lighting uses LED bulbs, and every bulb replaced is low-energy LED.
- Motion detectors and timers are installed in corridors and common areas.
- Heating is turned off in unoccupied rooms.
- We use rechargeable batteries to reduce waste generated by equipment.

3

## WE REDUCE AND SORT OUR WASTE

- Several products are offered in bulk or in large formats to limit packaging.
- We have replaced traditional welcome amenities with Ecopump dispensers.
- Organic kitchen waste is sorted and processed in our composter.
- We reduce the use of plastic in favor of recycled or recyclable materials.
- Burnt-out light bulbs and computer equipment are systematically recycled.
- We also sort printer cartridges.

# 4

## WE CARE ABOUT THE WELL-BEING OF OUR GUESTS

- Breakfast features regional products sourced directly from local producers.
- Bulk options and a yogurt machine help reduce food waste.
- Our cuisine is based on seasonal and local products, with menu options adapted to special diets.
- We also offer organic and/or fair-trade products.
- We do not use any oils or fats that are harmful to the environment.
- All our cleaning products are eco-labelled to ensure better air quality and reduce health risks.
- The use of bleach is prohibited: it is irritating and harmful to aquatic environments.
- The entire establishment is non-smoking.

# 5

## AND MUCH MORE...

- Beehives installed on the rooftop help support biodiversity and produce local honey.
- Our teams are encouraged to use reusable water bottles to reduce plastic waste.
- Installed water softeners help reduce daily laundry detergent use.

**Thank you for supporting our approach during your stay.  
Every action counts!**
